THANUSH

BASED ON THE TEACHINGS OF ICT.
SIMPLIFIED FOR TRADERS TO UNDERSTAND
AND EXECUTE WITH CLARITY.

ABOUT THIS BOOK

This book presents a simplified interpretation of the Silver Bullet model.

The objective is to explain liquidity, CISD, SMT, and execution concepts in a clear and practical manner.

The content focuses on simplicity, structure, and real-chart examples to help traders understand the model more efficiently.

This guide is intended for educational purposes and should be used alongside proper risk management and independent study.

PURPOSE

- Simplify complex concepts
- Focus on liquidity and execution
- Learn through real-chart examples
- Build a structured trading process

WHAT YOU WILL LEARN

- Liquidity (SSL & BSL)
- CISD
- SMT
- Entry Execution
- Real Chart Examples
- Risk Reward Management

MESSAGE TO THE READER

The goal is not to predict every market move.
The goal is to wait for confirmation,
manage risk, and execute with discipline.

One Setup. One Session. One Opportunity.

TABLE OF CONTENTS

01 Introduction to Silver Bullet

02 Liquidity Begins at Highs & Lows

03 CISD (Change in State of Delivery)

04 SMT & Correlation

05 Entry Execution

06 Real Chart Example Breakdown 1

07 Real Chart Example Breakdown 2

08 Real Chart Example Breakdown 3

09 Real Chart Example Breakdown 4

10 Real Chart Example Breakdown 5

11 Risk Reward Management

12 Thank You

One Setup. One Session. One Opportunity.

INTRODUCTION TO SILVER BULLET

A precise strategy. A specific time. A high probability setup.

WHAT IS SILVER BULLET?

Silver Bullet is a time-based trading model that focuses on the 10:00 AM to 11:00 AM New York session. This one-hour window is when the market most often reveals its true direction and delivers strong, high-quality moves.

Before 10 AM, price builds liquidity by forming short-term highs, short-term lows, equal highs, and equal lows. When the Silver Bullet window begins, liquidity is frequently taken, stop losses are triggered, and the market changes character.

After liquidity is collected, a Change in Structure Direction (CISD) confirms the shift, and price expands aggressively toward its next objective. The goal is to capture this expansion phase during the most efficient time of the day.

One window. One setup. One high probability opportunity.

WHY THIS TIME? (10 AM TO 11 AM NY)

- New York session is at full activity. Liquidity increases and volatility expands.
- Institutions and large participants execute major orders during this period.
- Liquidity built earlier in the day is most commonly attacked in this window.
- Higher probability of a structural shift and strong directional movement.

CORE LOGIC

LIQUIDITY BUILDS → LIQUIDITY SWEEP → CISD CONFIRMS → PRICE EXPANDS

THE SILVER BULLET IS NOT ABOUT PREDICTING PRICE.
IT IS ABOUT WAITING FOR THE MARKET TO REVEAL ITS INTENTION.

02
PAGE

THE MARKET SPEAKS THROUGH HIGHS & LOWS

Understanding Liquidity

Every candle, pattern, and strategy starts with one simple concept: **LIQUIDITY.**

A High represents **Buy-Side Liquidity (BSL)**

A Low represents **Sell-Side Liquidity (SSL)**

These areas attract price because they contain stop losses, breakout orders, and pending orders waiting to be filled.

That is why the market repeatedly attacks highs and lows.

SELL-SIDE LIQUIDITY (SSL)

When traders buy, they often place their stop losses below a swing low.

As more traders use the same low, liquidity builds beneath it.

Once enough liquidity is available, price may sweep that low before moving higher.

Price attacks SSL, collects liquidity, and then expands upward.

BUY-SIDE LIQUIDITY (BSL)

When traders sell, they often place their stop losses above a swing high.

As more traders use the same high, liquidity builds above it.

Once enough liquidity is available, price may sweep that high before moving lower.

Price attacks BSL, collects liquidity, and then expands downward.

SSL EXAMPLES (Price attacks lows first)

Price sweeps the low (SSL), collects liquidity and reverses higher.

Price takes out the low (SSL), grabs liquidity and then expands upward.

BSL EXAMPLES (Price attacks highs first)

Price sweeps the high (BSL), collects liquidity and reverses lower.

Price takes out the high (BSL), grabs liquidity and then expands downward.

THE CORE PRINCIPLE

The market constantly moves between liquidity pools.

LOW (SSL) ⇄ HIGH (BSL) ⇄ SSL ⇄ BSL

Before looking for entries, confirmations, or targets, first identify:

WHERE IS THE NEAREST LIQUIDITY?

Because the market often moves toward the next pool of liquidity before revealing its true intention.

KEY TAKEAWAY

HIGH = BUY-SIDE LIQUIDITY (BSL)

LOW = SELL-SIDE LIQUIDITY (SSL)

If you can identify important highs and lows, you can identify where the market is most likely to go next.

THE CHART MAY LOOK COMPLICATED. LIQUIDITY IS NOT.

03
PAGE

CISD
(CHANGE IN STATE OF DELIVERY)

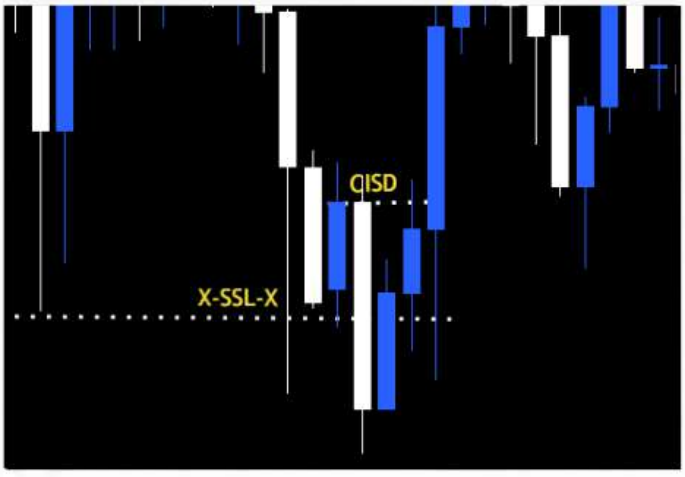
CISD is similar to MSS, but instead of focusing on structure, it focuses on the change in price delivery.

01 BEARISH CISD EXAMPLE 1

02 BEARISH CISD EXAMPLE 2

03 BULLISH CISD EXAMPLE 1

04 BULLISH CISD EXAMPLE 2



WHAT IS CISD?

CISD (Change In State Of Delivery) occurs when price stops delivering in one direction and starts delivering in the opposite direction. It shows that the market has shifted its delivery after liquidity is taken.

KEY POINTS

- CISD confirms that delivery has changed.
- Bullish CISD forms after SSL is swept.
- Bearish CISD forms after BSL is swept.
- CISD helps confirm direction after liquidity is taken.
- It is one of the core confirmations in the Silver Bullet model.

> **THE OLD DELIVERY IS FINISHED. A NEW DELIVERY HAS BEGUN.**

04
PAGE

SMT + CISD

SMT provides the *clue*. CISD provides the *confirmation*.

BULLISH SMT EXAMPLE

One pair sweeps liquidity while the correlated pair fails to confirm.
CISD then confirms the bullish reversal.

BEARISH SMT EXAMPLE

One pair creates a higher high while the correlated pair fails to do so.
CISD confirms the bearish shift.

WHAT IS SMT?

SMT (Smart Money Technique) occurs when two correlated markets fail to make the same high or low.

This disagreement can reveal where Smart Money may be preparing to reverse price.

EXAMPLE CORRELATION PAIR

EURUSD ↔ GBPUSD

These pairs usually move together.
When they disagree, SMT is created.

CORE PRINCIPLE

SMT SHOWS THE CLUE

↓

CISD CONFIRMS

↓

PRICE EXPANDS

KEY TAKEAWAY

SMT highlights the initial imbalance between correlated markets (the clue).
CISD validates the setup by confirming the reversal, increasing the probability of a strong and sustained move in price.

05 PAGE

ENTRY EXECUTION

The entry is simple. Direction first. Execution second.

WHAT IS ENTRY EXECUTION?

- Entry execution is the process of aligning higher-timeframe direction with lower-timeframe confirmation.

- **The 15-minute timeframe provides direction.**
- **The 1-minute timeframe provides execution.**
- **Trade only in the direction of the 15M Bias.**

STOP LOSS RULE

BUY SETUP

- Stop Loss below CISD swing low.

SELL SETUP

- Stop Loss above CISD swing high.

01 BEFORE SILVER BULLET (15M TIMEFRAME)

1. Check the 15-minute timeframe.
2. Look for any High Sweep or Low Sweep.
3. Wait for CISD.
4. Find the Bias.

- **Bullish CISD** = Buy Bias.
- **Bearish CISD** = Sell Bias.

02 DURING SILVER BULLET (1M TIMEFRAME)

1. Switch to 1-minute timeframe.
2. Trade only in the direction of the 15M Bias.
3. Mark Silver Bullet opening candle open price.
4. Wait for manipulation.
5. Wait for SMT.
6. Wait for CISD.
7. Enter on CISD candle close.

03 SELL ENTRY (15M BIAS = BEARISH)

1. Mark Silver Bullet opening candle open price.
2. Price sweeps **above** the open price.
3. Liquidity is taken.
4. SMT forms.
5. CISD forms.
6. **Sell Entry** on CISD candle close.
7. **Stop Loss** above CISD swing high.

03 BUY ENTRY (15M BIAS = BULLISH)

1. Mark Silver Bullet opening candle open price.
2. Price sweeps **below** the open price.
3. Liquidity is taken.
4. SMT forms.
5. CISD forms.
6. **Buy Entry** on CISD candle close.
7. **Stop Loss** below CISD swing low.

04 IF THERE IS NO 15M SWEEP BEFORE SILVER BULLET

1. Wait for a 15-minute High Sweep or Low Sweep.
2. Wait for 15M CISD.
3. Find the Bias.
4. Switch to 1-minute timeframe.
5. Mark Silver Bullet opening candle open price.
6. Wait for manipulation.
7. Wait for SMT.
8. Wait for CISD.
9. Execute the trade.

05 CORE LOGIC

15M Sweep
↓
15M CISD
↓
15M Bias
↓
Silver Bullet Open Price Marked
↓
Manipulation
↓
SMT
↓
CISD
↓
Entry
↓
Expansion

KEY RULE

Direction comes from the 15-minute timeframe (Bias).

Execution comes from the 1-minute timeframe.

FINAL PRINCIPLE

THE BEST ENTRIES ARE NOT PREDICTED.
THEY ARE CONFIRMED BY THE MARKET.

RISK MANAGEMENT

Protect Capital. Let Winners Run.

1:3 RISK REWARD MODEL

- Enter trade.
- Target = 1:3 RR.
- When price reaches 1:2 RR, move Stop Loss to Break Even.
- Let the remaining position run to 1:3 target.

EXAMPLE:

Entry → 1:2 RR → Move SL to BE → Hold for 1:3

1:2 RISK REWARD MODEL

- Enter trade.
- Target = 1:2 RR.
- When price reaches 1:1 RR, move Stop Loss to Break Even.
- Let the remaining position run to 1:2 target.

EXAMPLE:

Entry → 1:1 RR → Move SL to BE → Hold for 1:2

BREAK EVEN RULE

- ✅ 1:3 Model → BE at 1:2
- ✅ 1:2 Model → BE at 1:1

- ❌ Do not move to BE too early
- ❌ Do not widen Stop Loss
- ❌ Do not close because of fear

CORE LOGIC

QUICK SUMMARY

1:3 MODEL

Target: 1:3	BE at: 1:2	Final Target: 1:3

1:2 MODEL

Target: 1:2	BE at: 1:1	Final Target: 1:2

FINAL PRINCIPLE

LOSE SMALL. PROTECT CAPITAL.
LET WINNERS PAY FOR LOSERS.

THANK YOU

Thank you for taking the time to read this book.

I hope the concepts shared in these pages help simplify your trading journey and provide a clearer understanding of liquidity, SMT, CISD, and the Silver Bullet model.

This book represents my personal interpretation and simplified understanding of the concepts.

SPECIAL THANKS

ICT
INNER CIRCLE TRADER

A special thank you to **ICT (Inner Circle Trader)** for introducing and teaching the original **Silver Bullet** concept.

The knowledge shared through his work has helped thousands of traders understand liquidity, timing, and market structure at a deeper level.

This book is not a replacement for the original teachings.

It is simply my attempt to present the concepts in a **simpler and easier-to-understand** format.

FINAL MESSAGE

The market will always be there tomorrow.
Protect your capital. Trust your process. Stay patient.
